ELSHAM
DENIM AND GARMENT MANUFACTURER

about us

Founded in 1985, ELSHAM began in Syria as a pioneering denim laundry, specializing in premium garment washing and finishing. Built on decades of family expertise, the company established a strong reputation for craftsmanship, precision, and innovative denim treatments.

In 2000, ELSHAM established its presence in Egypt, expanding its capabilities and partnerships with leading fashion brands and manufacturers. For over 40 years, the company has combined deep technical expertise with modern technology to deliver distinctive washes, refined finishes, and consistent quality to international standards.

history

(1) **1985**

Established the laundry in Syria, Aleppo

(2) **2000**

opened the factory in Egypt

ranked as one of the largest laundries in denim field in the middle east

(5) **2023 till now**

exporting to turkey and worldwide

EMIL SAYDE

CHAIRMAN | ELSHAM DENIM LAUNDRY & MANUFACTURING

Emil Sayde founded ELSHAM in 1985 with a vision to establish a denim laundry built on craftsmanship, innovation, and uncompromising quality. Bringing extensive textile expertise from Syria to Egypt, he pioneered advanced denim washing and finishing techniques that helped shape the local denim industry.

Today, under his leadership, ELSHAM has become one of Egypt's leading specialists in garment washing, finishing, and denim innovation, serving local and international fashion brands with premium-quality products.

Chairman's Message

"The continuous researches about what's new in the labs and connecting with the highest specialized expects makes us see the jeans like gold, the blue gold. that's because what it needs from experience and art.

Now our research and work makes us in a level we are proud of and that's according to the certification of our Egyptian and foreigner clients.

To reach to top and keep this success considering our clients trust, we wouldn't stop looking for the development and creativity of the art technology of jeans and garment processing in Egypt.

That's why we El Sham company put more than 30 years of experience in the Egyptian market to compete with the local product in the worldwide market"

denim innovation

We are committed to always stay up to international standards and quality while looking after the wellbeing of our planet and humanity.

01. **WASHING MASTERY**

- Design & development for denim fabrics
- Customized printing designs
- In-house dyeing and finishing
- Intricate embroidery services

02. **GARMENT MANUFACTURING**

- Automated precision meets artisanal expertise
- Full garment design & development
- Precise pattern making and sampling
- High-quality cutting and sewing lines
- Detailed finishing & professional packing

03. **SCALABLE PRODUCTION**

- MOQ flexibilty and rapid bulk output
- Fully vertically integrated manufacturing
- Seamless transition from fabric to finished product
- Strict quality control at every stage

04. **GLOBAL PARTNERSHIP**

- Sedex certified, iso 9001, iso 14001 and iso 45001
- Provide B2B manufacturing and export to leading global fashion and fashion denim brands

production line

ELSHAM operates a fully integrated production system that combines manufacturing expertise with advanced finishing capabilities. Our facilities are structured to support large-scale production while maintaining the precision and flexibility required for premium apparel.

Every garment passes through a carefully controlled process, ensuring efficiency, consistency, and adherence to international quality standards.

production flexibility

01. **FABRIC TESTING**

We ensure excellence through thorough fabric checks (%100–10) for defects and shade variations, testing shrinkage, crocking, burst strength, skewing, weight, and color for top quality.

02. **TRIMS INSPECTION**

Every trim undergoes a meticulous %100 inspection for both quality and quantity, ensuring that only the best materials are used in our products.

03. **CUTTING INSPECTION**

Before production, we perform a detailed cutting inspection to maintain the integrity and quality of the fabric, ensuring that every piece meets our stringent standards.

04. **QUALITY AUDITS**

All styles are subjected to a 2.5 AQL (Acceptable Quality Level) audit, guaranteeing that our products consistently meet industry standards and exceed customer expectations.

ELSHAM
DENIM AND GARMENT MANUFACTURER

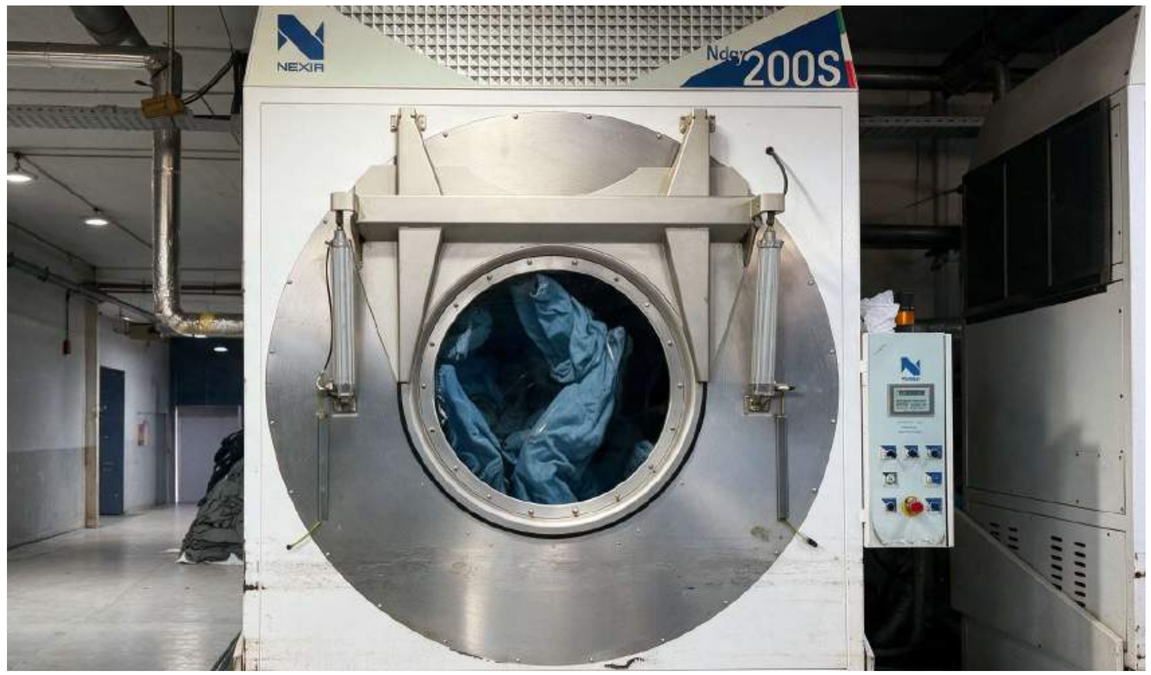
Company Profile 2026

the laundry

Denim washing is where ELSHAM's story began

the laundry

Denim washing is where ELSHAM's story began



We do all kinds of washing of the latest fashion demands.

- Garment wash with silicone / softener
- Enzyme stone wash
- Enzyme with medium / light bleach
- Antique wash
- Classic wash
- Vintage / bleach / sky
- Tinting
- Over-dyeing
- Reactive dyeing

We also offer all types of dry processes, such as:

- Hand sanding
- Spraying (P.P.)
- Brushing
- Whiskering
- 3D whiskering
- Chevrons
- Laser printing
- Grinding
- Damage
- Marble effect
- Resin crinkles
- Tying
- Spider effect
- Tacking

laser technology

ELSHAM's laser department is equipped with five NRAY laser marking systems, enabling the development of advanced denim finishes with exceptional consistency and efficiency. The technology allows for the creation of authentic whiskers, vintage effects, distressed looks, all-over graphics, and customized artworks across a wide range of denim products.

sustainable world

LED LIGHTING UPGRADE

We've replaced traditional lighting across the factory with high-efficiency LED systems, lowering electricity consumption, cutting emissions, and minimizing operational costs.

ENERGY-SAVING BOILERS

We've installed advanced industrial boilers that power key manufacturing processes using steam and hot water, while significantly reducing gas consumption. This upgrade enhances energy efficiency and keeps our operations aligned with the latest sustainable technologies.

WATER TREATMENT SYSTEM

Our on-site water treatment plant ensures no hazardous chemicals are discharged into the city's drainage system. Unused and dyed water is safely treated and reintegrated into the production process, reducing waste and promoting responsible water usage.

AQUAPONICS FOR STAFF WELLBEING

We've introduced an in-house aquaponics system that sustainably grows lettuce, cucumbers, and peppers using nutrient-rich water from fish tanks. These fresh, pesticide-free vegetables are harvested and made available for our staff to take home — supporting health, reducing food waste, and fostering a greener workspace

ELSHAM
DENIM AND GARMENT MANUFACTURER

Company Profile 2026

global exporting

Middle East ▪ Europe ▪ North America ▪ Africa

1 DUTY-FREE ACESS

QIZ, EUR.1, GCC

Egypt benefits from duty-free exports to major markets like the European Union (EU) and the United States (QIZ) thanks to trade agreements that support market access and economic cooperation.

2 HIGH QUALITY

Skilled labor, In-House production

Egypt's manufacturing industry features a skilled workforce with extensive experience in textiles and apparel, ensuring high-quality standards that meet global market demands.

3 FAST DELIVERY

5-6 days to EU, 20-23 days to US

Due to Egypt's geographic proximity to Europe (5-6 days) and the United States (20-23 days), it offers shorter shipping times, leading to lower costs and faster deliveries.

4 COMPETITIVE PRICING

Better value Vs. Vietnam/Bangladesh

Egypt provides affordable pricing paired with high product quality, making it competitive with countries like Vietnam and Bangladesh, especially in the textiles and apparel sectors.
